

INDUSTRIAL BOLTING

B-RAD Select BL 500

Also available with spark proof reaction arm and sockets.

130-500 ft.lbs.
Accuracy of +/-5%

The B-RAD torque tool by New World Technologies is rapidly becoming the tool of choice in the rail industry for torquing manway bolts. Impacts tend to over-torque manway bolts while bending the ears of the manway covers. T-Wrenches can slip off the nut causing the operator to slip and fall while being a cumbersome tool to use.
